

Land and Climate Action: Global Experiences in Securing Land Rights and Climate Goals

Stamatis Kotouzas (USA)

SUMMARY

The presentation explores the critical role of land in achieving climate goals. It highlights the significant reliance on land-based solutions, particularly reforestation and afforestation, for carbon dioxide removal. The presentation emphasizes the need for improved land tenure, sustainable land management, and equitable access to land for climate actions. The presentation will focus on global experiences in achieving climate goals and securing land and territorial rights of Indigenous Peoples.
