

Comparing the way the States of Australia present Cadastral Plans, fieldnotes and reports.

Peter Farren (Australia)

Key words: Cadastre; History; Legislation

SUMMARY

Topic: Comparing each individual state Cadastral System in Australia□□In terms of survey plan presentation, report writing, fieldnotes, computations etc□□□My name is Peter Farren□□I have been in the industry since 1990.□□I have been a Licensed Surveyor in Victoria, Queensland, NSW and WA.□□I have operated and owned my survey practise for 25 years now and still going strong.□□From my own professional experience, I believe I can best explain to the audience how each State cadastral system presents the final product to the community□□I will briefly explain the History of how each cadastral system evolved in each state.□□I will show plans, charts, title plans, fieldnotes from 1800's to now.□□I will explain the reasons why each state adopted the methodologies of field survey techniques.□□From all this information and from own experiences I will select the best and most effective way to present survey data and plan presentations to the public.□□I will spell out that a country of only 27 million population has 8 different ways of presenting cadastral plans and field notes.□It needs to be standardized.□□This will create a lot of debate in the audience.□□I will add photos for me surveying in the desert, tropical rainforest, city and rural areas□□□Peter Farren□Licensed Land Surveyor 1760 Victoria□□□

Comparing the way the States of Australia present Cadastral Plans, fieldnotes and reports. (13330)
