

# **Cadastre 2026: Renewed, Re-imagined, Recommitted and Relevant?**

**Rohan BENNETT, Australia and Kirsikka Riekkinen,**

**Key words:** land administration, land management, Commission 7

## **SUMMARY**

In 2023, after a period of turbulence and uncertainty brought on by the global pandemic, the international land administration community - through FIG Commission 7 - set out a plan to renew, re-imagine, and recommit to global advocacy, networking, and knowledge creation in cadastre and land management. This paper reflects on that plan: what was achieved, what worked, what did not, and what may come next. It reviews the outcomes of key events held during the period, highlights publications produced and in progress, and considers the role the global land administration community can play in the decade ahead.

# Cadastre 2026: Renewed, Re-imagined, Recommitted and Relevant?

## SUMMARY

In 2023, after a period of turbulence and uncertainty brought on by the global pandemic, the international land administration community - through FIG Commission 7 - set out a plan to renew, re-imagine, and recommit to global advocacy, networking, and knowledge creation in cadastre and land management. This paper reflects on that plan: what was achieved, what worked, what did not, and what may come next. It reviews the outcomes of key events held during the period, highlights publications produced and in progress, and considers the role the global land administration community can play in the decade ahead.

## BIOGRAPHICAL NOTES

**Prof. Rohan Bennett** is an internationally recognised land administration expert and a long-standing leader within the International Federation of Surveyors (FIG). As former Chair of FIG Commission 7 (Cadastre and Land Management), he has played a key role in advancing FIG's global work on fit-for-purpose land administration, tenure security, and land governance reform, linking research, policy, and practice across diverse country contexts.

**Kirsikka Reikkinen** is a senior land administration specialist with extensive engagement in the International Federation of Surveyors (FIG), particularly through FIG Commission 7 (Cadastre and Land Management). Her FIG work focuses on responsible land governance, tenure security, and institutional development, contributing to international dialogue and practical guidance on strengthening land administration systems in support of sustainable development.
